

Course 3 OVERVIEW

- Working Equitation & Developing Feel -

Delving deeper into Jonathan's program, the journey focuses more on developing your "Feel" and timing so that you can ask more of your horse on a physical, technical and mental level. When your horse can feel back to you, his whole body turns loose, allowing more advanced maneuvers to come easily and beautifully. Working equitation exercises are a great way to add purpose and challenge for both horse and rider and you'll learn basic patterns that can give you focus, improve your timing and highlight how fundamental exercises connect to more challenging and fun tasks!

- Understand lateral & longitudinal flexion and how to use them to create balance, softness inside collection
- New concepts "Samarai Circle" & "Tye-dye"
- Develop you horse's self carriage for healthy biomechanics and long-term soundness
- Develop maneuvers like: shoulder-in, lead departures, correct circles, leg yield, half-pass
- Each day you will try interactive purpose exercises that test all the details you've learned
- Discover how being specific with your horses feet will help your timing improve dramatically
- Do transitions with greater collection right down to the stop & back-up
- Really get in to the Flying Lead Change Program Jonathan has developed

** There's always a slight difference in the dynamic of each group of people and horses. Some lessons may be focused on more than others, including some not mentioned here. If one of these goals is important to you, please mention so at the beginning of the clinic.*
